# Manufacturing Pavilion

The “PTC/USER World Event 2009” will again feature an exclusive destination inside of the exhibit hall focused on manufacturing solutions. PTC manufacturing software solutions will be featured by Product Managers in the center of the pavilion. In addition to PTC specific manufacturing solutions, PTC PartnerAdvantage™ companies that specialize in manufacturing related solutions will be featured in this special destination.

PTC/USER will provide destination specific pre-event target marketing informing our global member database about this unique and highly focused destination. We feel confident that with the pre-existing demand along with our focused marketing, the Manufacturing Pavilion will be a high traffic area with plenty of customers and prospects interested in the solutions offered by manufacturing related exhibitors.

## Qualification

If your company is a provider of manufacturing specific solutions and you are a PTC PartnerAdvantage™ company, select a booth in the Manufacturing Pavilion when you register to exhibit at the PTC/USER World Event 2009.

## Displays/Prototyping

PTC/USER urges all eligible exhibitors that select this topic-specific destination to focus your exhibition on both electronic graphical solutions and, if possible physical examples. The Manufacturing Pavilion is being designed to support physical prototyping. Whether pre-fabrication prototyping or final design components, feel free to let us know what you need to showcase your ability to work with PTC data to generate products. Our audience is very interested in integrated solutions that solve their real-world manufacturing related issues.
